CCTV – Wireless and Wired solutions

Italian Refinery Operational Efficiency

Honeywell

Application: Various under 1- redundant network

Challenges:

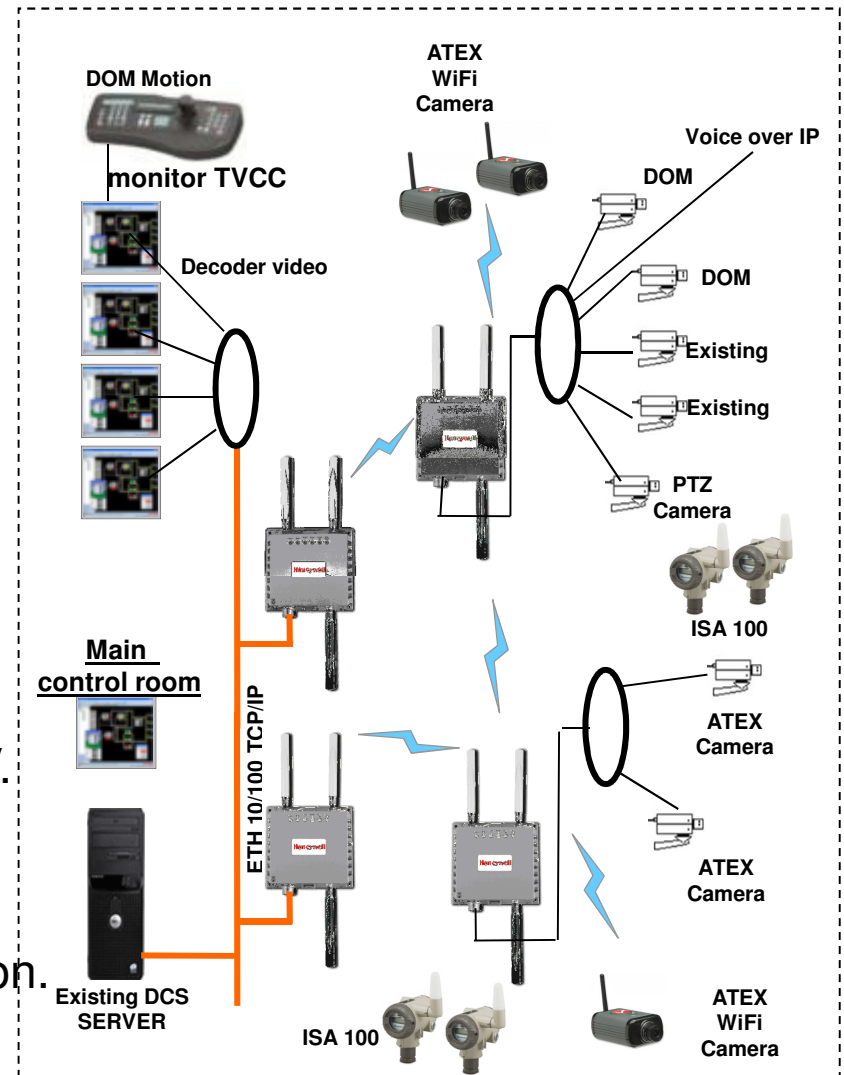

- Optimize operator rounds (process & video)
- Remote assets monitoring
- VOIP for remote communication needs
- Process variable acquisitions

Solution:

- OneWireless Mesh network
- Wireless ISA100 Transmitters
- Honeywell DOM & Fixed ATEX Cameras.
- Honeywell Security group expertises for CCTV.

Results

- Single network solving multiple problems.
- Short project schedule and fast implementation.
- Fast ROI (3 months)
