WHY ITALY?

Castello Belgioioso is an historic venue that will let visitors reflect on the great efforts of our predecessors. Italy is the cradle of creativity, from Leonardo da Vinci to Galileo Galilei, Enrico Fermi and Giulio Natta. Italy is also the place where industry leaders like Tecnimont, Saipem, Technip, Techint and Foster Wheeler are located with many Oil and Gas, Petrochemical, Power and Steel plants from all over the world. Many local suppliers have been supporting this international success and they are proud to share their experience and case history of successful projects worldwide with other international suppliers within the market.

These two days conference will provide an excellent opportunity for all to participate in discussions on automation, instrumentation, analyzers, communication, control systems, SCADA, safety, fire and gas, integration and cybersecurity.

THE EXHIBITION

The Automation Instrumentation Summit® will take place in Castello Belgioioso near Milano, Italy, on July 5-and 6, 2017. The worldwide recession can become an opportunity for us to look at what we have done so far, and identify the best strategies for future improvements.

The manufacturing companies will have the opportunity to showcase their products and solutions at the stands of the exhibition area whereas the speakers will present their papers based on case histories and share common experience with all the other expertise during the AIS- ISA Italy conference.

Exhibition prices

Due to some building restriction of the historical venue equipped stand space are provided:

- A ▶▶ 6 m² ▶▶ EUR 5.000,00 + 22 %VAT
- B ▶▶ 8 m² ▶▶ EUR 7.000,00 + 22 %VAT
- C ▶▶ 12 m² ▶▶ EUR 10.000,00 + 22% VAT

The equipped stand space includes:

system back wall height 210 cm, spotlights, carpet, power connection (220 v - 2 Kw) with socket, 1 information counter with stoll, fascia lettering, waste basket, daily cleaning, waste disposal, basic catalogue registration.

THE CONFERENCE

To overcome the recession, the market has to better understand the needs of end users and customers.

Through the presentation of case histories, conference attendees will gain knowledge of technological advances in automation and applied process improvements.

Key to the success of the conference is not just to inform conference attendees about current technology but to bring awareness on how this technology has been applied in order to improve productivity, quality and sustainability within industry.

Abstract submissions should consider: What was the technology need? What was the productivity loss or improvement? How the customer solved the problem? What was the final outcome? Abstracts from end users, consultants, engineering companies and manufacturing companies are welcome in order to share automation knowledge for the mutual benefit of all! Our Advisory Board members of AIS will select authors and presenters that can meet this challenge.

ABSTRACTS MUST BE SUBMITTED BY FRIDAY APRIL 28 2017

To facilitate the review of abstracts and selection of potential speakers, please do not delay submission of your abstract, the sooner the better!

Please send your presentation in PowerPoint or pdf format to: event@aisisa.it.

The main body of the abstract should be between 150 and 300 words and in “understandable” English.

THEMES AND TOPICS

THEME 1 ►► ADVANCES IN CONTROL SYSTEMS

THEME 2 ►► CONTROL AND PLANT COMMUNICATION

THE CONFERENCE VENUE: CASTELLO DI BELGIOIOSO

It is believed to have been the initiative of Galeazzo II, who had it built on the extensive landholdings of the Visconti family in the second half of the 14th century. This historic monument now offers a stunning setting for public and private events, including weddings and company parties.

The Ente Fiera now boasts thirty years of experience in the organization of exhibitions and art events, drawing in more than 600 exhibitors and over 80,000 visitors each year from all over Italy.
