

Setting the Standard for Automation™

IC-32E Cybersecurity Training Course

ONLINE

The only ISA/IEC 62443 Training with Official Certification (*)

Using the ISA/IEC 62443 Standards to Secure Your Control Systems ([IC32E](#))

The move to using open standards such as Ethernet, TCP/IP, and web technologies in supervisory control and data acquisition (SCADA) and process control networks has begun to expose these systems to the same cyberattacks that have wreaked so much havoc on corporate information systems.

With the introduction of the new UK HSE Operational Guidance OG-0086, the need to understand the fundamentals of control system security has never been more important. This course provides a detailed look at how the ISA/IEC62443 standards can be used to protect your critical control systems.

It also explores the procedural and technical differences between the security for traditional IT environments and those solutions appropriate for SCADA or plant floor environments.

This course is part the ISA/IEC 62443 Cybersecurity Certificate Program.

Visit; www.isaeurope.com for more detailed information please.

DETAILS

This course is given monthly. starting dates are;

- May 11
- June 1
- August 3
- September 28

EXAM

The exam can be done at a [Prometric center](#) (located worldwide) or online provided by [Scantron](#)

Price : Cost for ISA members: Training = € 1.575,- (Including exam)
non-ISA members pay € 1.875,- (including exam)

You can become ISA regular member on <https://www.isa.org/membership/join-isa/>

(*) Candidates must successfully complete the course and pass the exam at Prometric Center to receive their certificate; **ISA/IEC 62443 Cybersecurity Fundamentals Specialist**
